

# Quadcopter drones

## Worksheet one

### Information Technology and Communication

With Mr Gowland

You can take a photo of these notes on the whiteboard so you can type them up quickly.

**Write these questions in word then do the research to get the answers.**

If you copy and paste you may pass only just, if you can prove you understand. If you want a higher grade it must be in your own words.

- 1 Leave spaces for your answers.
- 2 What is a quadcopter drone?
- 3 What are drones used for?
- 4 What is headless mode?

Simply headless mode is a method of giving up worrying about orientation all you must do is make sure the drone is facing the same way in front.

- 5 What is roll yaw and pitch.
- 6 Who is responsible for setting rules for flying machines in Australia?
- 7 What are the rules concerning flying Quadcopter drones in Australia?
- 8 Write down the steps and explain how to start beginners course for drone driving.
- 9 Write down the steps for a beginner starting a drone. Explain how you did it example check is switching on the drone switching on the control.
